Good morning from Kyiv, a newly born Ukrainian baby girl! Life continues and so will #Ukraine!

💙💛

Bill Clinton @BillClinton · Mar 18

America stands united with the people of **Ukraine** in their fight for freedom and against oppression.

Meet Artem Bonov, the Deputy Head of Police in Kiyiv (Kiev). He was trained at the same **Nazi** camp in **Ukraine** that the New Zealand mosque mass-murderer Brenton Tarrant trained in.
God help any non-white student still trapped in that **Nazi** infested country
#NaziUkraine **#Ukraine**

عمار الكاظمي @AmmarKazmi_ · Mar 17

Apparently, we're all supposed to ignore the portraits of Stepan Bandera, flags of the Right Sector, Black Suns and other **Nazi** symbols, the Islamophobia and anti-black racism, and the fact that neo-Nazis from across the planet are deciding to congregate in **Ukraine**.

Well, no.

Motivation

- One of the most relevant elements of the war nowadays is information war
- It’s easy to manipulate using mass media
- Russian trolls are very active
- The greatest propaganda takes place on twitter

That’s why we are here

How it is built

- AI module
- DevOps and cloud
- Frontend

when ariana licked that donut and said she hates america it created a chain of events that led to the invasion of Ukraine

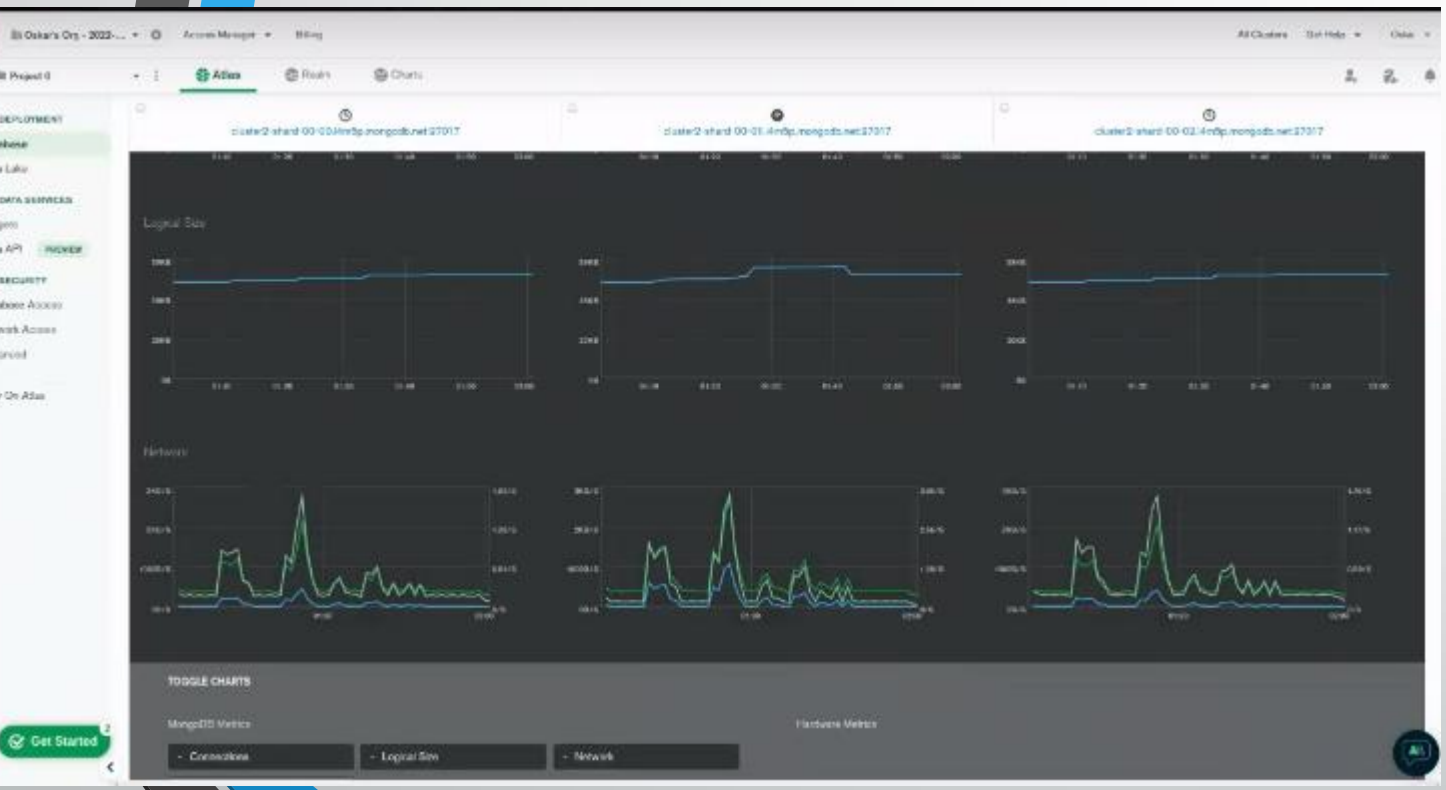
Trump knew Putin would invade Ukraine. But, both Trump and Putin thought Trump would be reelected. Thank goodness President Biden won!

AI

python™

PyTorch

DevOps and Cloud



aws

Frontend

What we succeded

- Communicate all modules efficently
- Create beautiful front-end
- Create decently working model

What we didn’t succeed

- Frontend isn’t foolproof
- Stability of connections
- Model could do much better
- Data we created is biased towards our worldview

Thank for your attention
